

NISARG
OIL & GAS LIMITED

FUELING THE FUTURE
OIL AND GAS FOR A BETTER TOMORROW

ABOUT US

Nisarg Oil & Gas Limited, is a private organization focused on the resources the world needs to develop and decarbonize. Our primary focus is on exploring oil and gas, along with their excavation and trading in the global market.

Nisarg Oil & Gas Limited is powered by dedicated professionals who are focused on discovering and responsibly developing leading positions in global oil and gas market.

This industry platform shows the efforts of the mining industry towards sustainability by felicitating the mines that have performed better on the index of star ratings.

It is a forum for discussion on recent policy initiatives, challenges, and opportunities being faced by the mining sector, with overall objective development.

Nisarg Oil & Gas Limited has its focus basically on unearthing fuels, which fall under the category of important transitions.

Nisarg Oil and Gas Industries provides various community services with a well-managed staff and environmental concerns.

Nisarg's core values serve as the foundation of our business and are essential to its success. From sharing best practices to protecting our employees and business partners, we know that top performance can only come when you commit to acting with integrity and character.

Our purpose is to bring people and resources together to build a better world. We do this through our strategy to deliver long-term value and returns throughout the cycle.

MR. MAHENDRA GOENKA

An integral part of Nisarg's operations and management and has been a key driver of the fund's growth, diversification, and value creation both within India and internationally. His rich and diversified experience of 20 years in mining, financial expertise, and people management capabilities led him to multiple businesses and promotions.

An enthusiastic and energetic management graduate plays vital roles in several companies like Nisarg Ispat Private Limited and Euro Pratik Ispat (India) Private Limited.

Mr. Mahendra Goenka steered the creation of the biggest iron ore beneficiation plant in central India named Geomin Industries Private Limited and further onto setting up a new venture, Dhanwantari Global Limited in Somaliland.

His entrepreneurial spirit as an inspiring leader visualized the growth of our company.

MR. PRASHANT SINGH

Mr. Prashant Singh is an engineer by profession with a vast experience in the field of mining industry and expertise in geological exploration over two decades.

He has been in the iron industry, ore industry, ore extraction, coal, and precious metal elicitation through their growth journeys. He is instrumental in execution and has also led various companies in India and abroad.

Apart from leveraging his experience, Mr. Prashant Singh continues to shoulder responsibility in Somaliland through the initiatives of the company.

MR. MEECAD ISAAQ XUSEEN

A local partner always plays a significant role in building our organization.

As a result of his assistance, the mining area has become more explorable and suitable for mining.

His guidance has helped us know and connect with the people of Somaliland.

Furthermore, his impactful and hospitable nature has made Somaliland very adaptable to the company.

He is a well-known figure in Somaliland and was elected as a Member of Parliament from the Sanang region. He is also a member of various parliamentary committees of the Somaliland government.

GROUP PROFILE IN INDIA OF NISARG OIL AND GAS LTD.

In order to establish Nisarg Oil and Gas, the following entities have contributed:

EURO PRATIK ISPAT PVT. LTD.

Being an imminent global and reputed community trader since 1993, Euro Pratik Ispat is a private organization headquartered in India with a well-qualified and fully equipped team working round the clock for its betterment and promising future.

Euro Pratik Ispat has its sole purpose of advancing and redefining the global trade scenario; it also has a young, vibrant, and developed mindset for working and is diversified for trading in oil and gas, steel, iron, manufacturing metals, mostly in iron ore, coal, coke, and lead industries, and a trading platform ranging from minerals to metals.

It comprises highly motivated and experienced professionals who strive to provide the best-class products to the client and comply with the global standard of environmental control. Their vision is to consistently expand the production capacity in a sustainable manner to meet the world-wide steel demand as their end goal.

Euro Pratik is one of the largest exporters of iron fines from India to China. Euro Pratik has exported iron ore worth 450 crore in 2022 to China.

NISARG
OIL & GAS LIMITED

NISARG ISPAT PVT. LTD.

Involved in the manufacturing of basic iron and steel, this is a privately incorporated and classified non-government company, registered at the registrar of companies in Chhattisgarh. It focuses on the development of ore and coal deposits with a commitment to discovering viable mineral deposits and a mission to develop them into profitable mining operations.

The organization readily invests in clean energy solutions required for the energy transition to a low-carbon future, with its main dealings in iron ore helping in the advancement of rapid urbanization. The company is ready to set out for its "Atma Nirbhar Nation" goal using data analytics and artificial intelligence to help anticipate future market conditions. The mine plans are built to create value from the ore bodies, and market signals are used to flex the production mix.

The approach includes a positive impact in building a globally integrated, sustainable, world-class business that is customer-centric, making them a partner in their life choices, and a vision to be the highest value creator of the iron ore industry.

The mining industry indicates the cluster of processes that are involved with the extraction, management, and processing of naturally occurring solid minerals from the earth's surface.

As a result of mining, various economically valuable products might be obtained, namely coal, diamonds, metallic ores, oil, and so on. In some countries, manganese steel is deposited thermally onto steel for wear resistance and may also be used in the cast form for scrapers.

Social impact and CSR initiatives: Nisarg Ispat Private Limited has worked extensively on the development of infrastructure in and around its fields of work. Along with that, they have built local help and have emphasized working towards health, safety, and the environment.

GEOMIN INDUSTRIES PVT. LTD.

The exploration and extraction of low-grade iron ore deposits, as well as the production and international trade of iron ore, are the main priorities of Geomin Industries Private Limited, a major mineral processing company.

The group has purchased a number of iron ore properties in central India, and a full-scale mining operation is being conducted to meet the needs of a 1.2 million-ton iron ore beneficiation plant that is strategically positioned in the Gosalpur area of the Jabalpur region.

Modern technology and equipment, such as jaw crushers, cone crushers, mobile crushers, and heavy earth-moving machines, are used in automated mining and processing processes (HEMM).

The division can better utilize resources and meet the needs of a variety of customers by having flexible operations. It helps the company's main objective of grading steel for further processing in various industries.

PROPOSITION

Knowing Somaliland's mineral-rich resources, its ore-incorporated soil, and the substantial metal-based organic land, we would like to connect and engage with the government of Somaliland to amplify its economy and explore its constructed structures in mining.

The area of our interest in uprooting this land exposition includes oil & gas exploration in Somaliland, both on and & off-share.

Oli & Gas The petroleum industry, also known as the oil industry or the oil patch, includes the global processes of exploration, extraction, refining, transportation (often by oil tankers and pipelines), and marketing of petroleum products. The largest volume products of the industry are fuel oil and gasoline (petrol). Petroleum is also the raw material for many chemical products, including pharmaceuticals, solvents, fertilizers, pesticides, synthetic fragrances, and plastics. The industry is usually divided into three major components: upstream, midstream, and downstream. Upstream concerns exploration and extraction of crude oil; midstream encompasses transportation and storage of crude; and downstream concerns refining crude oil into various end products.

Petroleum is vital to many industries and is necessary for the maintenance of industrial civilization in its current configuration, making it a critical concern for many nations. Oli accounts for a large percentage of the world's energy consumption, ranging from a low of 32% for Europe and Asia to a high of 53% for the Middle East.

Nisarg Oil & Gas has partnered with an oil and gas exploration company. Our oil and Gas exploration partner is the leading consultant in India for oil and gas exploration.

More details can be gathered from our website www.nogl-sl.com

SOCIAL IMPACT AND CSR ACTIVITIES OFFERED BY NISARG OIL AND GAS LTD.

Propose to support community service by providing medicines and vaccine immunization.

In order to educate the people of Somaliland, the company has also planned on constructing elementary school facilities.

The company also plans to train and hire a team through their apprentice program for employment and labor work, which will help in local employment generation, urban development, and infrastructure development, like roads, schools, and hospitals, which are built around the site.

Local people are being trained and premiered so that their community is self-sufficient and can be hired for projects at their sites.

The proposal to have community service has tutored and nurtured a more optimistic mindset for the people of Somaliland and is impacting their development more constructively.
